

It's time to rethink the ceramic slab /

Our ceramic technology is just 3mm thin... yet so strong that it can be laid in 3mx1m slabs on exterior facades, on interior floors and walls, furnitures and interior design – and even over existing surfaces.

With more than one hundred colours and finishes to choose from, Laminam is redefining the way we think about covering large surface areas, melding robust and lighter-weight technology with the enduring aesthetic appeal of ceramic.

Dimension: 1000x3000mm

Thickness: 3mm and 5mm

Weight: 7.8kg/sqm and 12kg/sqm

Suitable applications:

- > High street retail
- > Commercial and residential floors and walls
- > Hotels, including monolithic designed slab bathrooms
- > Façade and rain screen systems
- > Luxury cruise ships
- > Pod construction
